

Improved efficiency and security

Company: Poštanska Štedionica bank
 Industry: Financial sector
 Location: Serbia
 The number of employees: 1,500

The effect on business operations:

- ✓ Installation of video surveillance system from one end to the other, as per branches and subsidiaries
- ✓ Significantly reduced maintenance and exploitation price of outdated, disparate analogue system
- ✓ Increased operational efficiency through more efficient surveillance

CHALLENGES

- Various non-standardized video surveillance systems
- Surveillance and maintenance on the branch level, was inefficient and without lots of automation
- Impossibility to response to the incident

SOLUTION

Platform has been designed and installed for video surveillance system management, including servers, archiving and surveillance software. New Cisco high resolution IP cameras are installed in 36 branch offices and subsidiaries of Banka Poštanska Štedionica. A special care has been taken in respect to protection of bank's existing investment.

Old cameras are connected to network by using a Cisco module for analogue video which transforms their output into IP

RESULTS

- ✓ Modernized work and reduced maintenance and training costs
- ✓ New cameras are providing higher quality images
- ✓ Faster response to the incident
- ✓ Significantly reduced total costs of maintenance
- ✓

“Company COM-4T is made of professionals in their branch, who possess a deep understanding of our need to create a modern, efficient and rational security surveillance infrastructure, by reducing total costs while using old equipment, wherever it is adequate. Now we have a healthy and flexible foundation for the future”.

Dragiša Lojanica

Director of IT Department, Bank Poštanska Štedionica
